

About Invisible International

Invisible International's mission is to reduce human suffering from stigma, invisibility, and marginalization through innovation, education, and data-driven research projects. A major programmatic focus is tick-borne illness and environmental impact on human health. The organization, founded and led by Harvard and Stanford trained clinical and scientific experts, fuels bold ideas and groundbreaking research that address invisible diseases. Invisible enables creative, thoughtful solutions that address critical needs and suffering, and encourages collaborative participation from multiple professions both inside and outside of medicine.

Invisible International is a Massachusetts nonprofit corporation operating through a fiscal sponsorship with Players Philanthropy Fund (Federal Tax ID: 27-6601178), a Maryland charitable trust with federal tax-exempt status as a public charity under Section 501(c)(3) of the Internal Revenue Code. Contributions to Invisible International are tax-deductible to the fullest extent of the law. Invisible's administrative overhead is 4%. We aim to keep this low so that your gift can be applied to impact and fast change.

Make an Impact by Giving

Invisible International is currently conducting a capital campaign to raise \$20M.

Medical Education Initiative

Invisible International is a U.S.-based nonprofit committed to alleviating the suffering caused by invisible illnesses, through medical education, research, and community empowerment. The organization, founded and led by Harvard and Stanford trained clinical and scientific experts, fuels bold ideas and groundbreaking research that address invisible diseases. The organization is led by physicians, scientists, and innovators who are **united by a shared mission to mitigate the impact of vector-borne and environmental illnesses, all of which are worsened by climate change.**

Continuing Medical Education & Global Medical School Curriculum

Invisible's Medical Education Initiative is our flagship program, and we are seeking philanthropic support to expand the existing platform. This growing library the **world's first and only accredited resource of continuing physician medical education (CME) courses in the vector borne illness domain.** It is offered at no cost to learners and is accredited by the American Academy of Family Physicians (AAFP). **Subject matter experts on vector-borne and environmental illnesses teach content on disease diagnosis, emerging research, and best-practice treatment strategies.** There are **currently over 4,000 online learners on this platform, and new courses are added monthly.** Invisible's team of clinical and scientific experts is working to integrate this curriculum into medical schools and hospitals, globally. By identifying these diseases early, patients can be treated successfully to prevent chronic illness. Website: <https://learn.invisible.international/>

Bench-to-Bedside Knowledge Network

The lack of formal communications channels between basic science researchers and clinicians often impedes the movement of scientific discoveries from labs to approved patient treatments. With animal-to-human disease spillovers on the rise, **we have designed a model for an online, moderated forum that brings together vector-borne disease researchers, veterinarians, and clinicians from around the globe to share early ideas and evidence on promising new research and treatments.** These participants will engage in discussions that will rapidly communicate scientific findings to the global medical community.

Make an Impact by Giving

Invisible International is seeking to raise \$500k USD/year to support the education initiative and \$250k USD/year for the bench-to-bedside knowledge network.
